

MHPPP Action Card

Major Haemorrhage Co-ordinator

ACTIVATE MHPPP (if not done by Clinical Team Leader)

- **Phone 2222**
- State *"Activate Major Haemorrhage Protocol for Paediatric Patient"*
- Provide to switchboard operator:
 - Patient location
 - Contact Extension Number for Paediatric Major Haemorrhage Co-Ordinator (DECT Preferred)

On initiation of Major Haemorrhage Response:

Assume Co-ordinating / Main Point of Contact Role

Ensure clear communication line between labs and clinical area (single contact DECT phone number preferred)

Ensure adequate staff available and assign roles / delegate:

- **Scribe**
- **Runners**
- **Checking / Hanging Blood Components**
- **Single designated person to manage Transfusion Authorisation and Administration Record.**

During Initial Resuscitation

Establish required blood components with Clinical Team Leader and Haematologist

Contact Blood bank to request:

- Nature and number of initial blood components
- Required level of urgency
(Immediate / Group Specific / Fully Cross-Matched)

Check initial bloods obtained and ensure correctly labelled:

Cross Match
(Tube *must* be hand-written)

FBC

U&Es

Calcium

Coagulation Screen

VBG

Frequent Reassessment / Review:

- Availability of laboratory blood results.
Communicate to Resuscitation Team Leader
- Liaise with Blood Bank regarding ongoing component requirements and expected time-frames for blood components / other products.
- Supervise Scribe to ensure accurate log of events is kept.
- Ensure blood components are returned to lab if not used

Hand over role of Paediatric Major Haemorrhage Co-ordinator

(including action card) to named person if patient moves to another location or shift changeover while MHPPP ongoing.

At conclusion of MHPPP response:

- Stand Down Blood Bank, Blood Porter and Switchboard
- Ensure "Blue Tags" completed and returned to Blood Bank.
- Return all unused components / products.
- Ensure all documentation completed.

Designate location, and ensure staff remain, for Hot Debrief
