## Inpatient pathway for RSV prophylaxis

16<sup>th</sup> Sept

October

November

December

January

29<sup>th</sup> Feb

1 week before any discharge during RSV season clinical team check baby's eligibility:

- (1) Baby < 32w gestation at birth?
  - If yes, is eligible for nirsevimab (see monograph for further details)
- (2) Being sent home in oxygen?
- (3) Has BPD and on BadgerNet RSV prophylaxis list?
  - If yes to (2) or (3), baby is eligible for nirsevimab as first-line immunisation, or palivizumab if first-line unavailable (see monograph for further details)

## **Offer Immunisation**

Once immunisation is given, please email **Judith Orme + Roy McDougall.** Any outpatient doses of palivizumab will be arranged.
